

Integrated Fuel Sourcing with Built-in Fraud Prevention

Streamline your fuel operations through our Value-Added Service

Your fleet's fuel management goes well beyond simple refuelling.

With increasing operational costs and fuel fraud concerns, Powerfleet provides comprehensive fuel oversight with built-in fraud prevention through our integrated Unity platform, now enhanced with a value-added service that expand your operational capabilities while securing every transaction.

Through our iWantFuel integration, Powerfleet extends your fleet intelligence platform to include seamless fuel procurement and management across South Africa's extensive network of refuelling stations.

Integrated fuel intelligence

Unified platform management

All fuel transactions feed directly into your existing Powerfleet dashboard, providing consolidated oversight of vehicle performance, maintenance schedules, and fuel consumption patterns within a single interface.

Enhanced data accuracy

Our integration automatically synchronises odometer readings with fuel purchases, eliminating discrepancies and ensuring maintenance scheduling remains precise and predictable.

Operational efficiency

Remove manual fuel transaction recording while maintaining complete audit trails. Every purchase generates detailed records that feed directly into your operational analytics.

Risk mitigation

Three-factor authentication and role-based access controls ensure only authorised personnel can approve and execute fuel purchases, preventing unauthorised spending and improving accountability.

Network access and control

Strategic location coverage

Access to over 360 vetted refuelling locations strategically positioned along major transport routes nationwide, ensuring your drivers can refuel efficiently without deviating from their routes.

Cost optimisation

Compare real-time pricing across multiple fuel providers, enabling cost-conscious decisions while maintaining operational flexibility.

Automated cashback integration

Fuel purchases generate immediate cashbacks, credited to your iWallet account with iWantFuel, which improves overall fuel cost efficiency without additional administrative overhead.

Operational integration benefits

Seamless driver experience

Drivers receive secure purchase authorisation via SMS and WhatsApp, eliminating cash handling whilst maintaining purchase verification and approval workflows.

Real-time visibility

Monitor fuel transactions as they happen, with immediate integration into your fleet performance metrics and cost analysis reports.

Compliance and reporting

Generate detailed fuel usage reports that integrate with vehicle utilisation data, supporting both operational optimisation and regulatory compliance requirements.

Maintenance correlation

Fuel consumption patterns are integrated with vehicle diagnostic data, enabling predictive maintenance scheduling and identifying vehicles that require attention before costly breakdowns occur.

Why choose Powerfleet's integrated approach?

Single platform intelligence

Rather than managing separate fuel and fleet systems, everything consolidates within your existing Powerfleet environment, reducing training requirements and operational complexity.

Data-driven insights

Fuel consumption analysis is combined with vehicle performance metrics, route optimisation, and driver behaviour patterns to deliver comprehensive operational intelligence.

Scalable implementation

Whether managing ten vehicles or a thousand-vehicle fleets, the system scales seamlessly while maintaining consistent oversight and control capabilities.

Ready to transform your fuel management?

Discover how Powerfleet's integrated fuel management through our iWantFuel partnership can reduce costs, improve oversight, and streamline your fleet operations.

Sign up for **iWantFuel integration today** and start optimising your fuel operations immediately.

Powerfleet (Nasdaq: PWFL; JSE: PWR; TASE: PWFL) is a global leader in the artificial intelligence of things (AIoT) software-as-a-service (SaaS) mobile asset industry. With more than 30 years of experience, Powerfleet unifies business operations through the ingestion, harmonisation, and integration of data, irrespective of source, and delivers actionable insights to help companies save lives, time, and money. Powerfleet's ethos transcends our data ecosystem and commitment to innovation; our people-centric approach empowers our customers to realise impactful and sustained business improvement. The company is headquartered in New Jersey, United States, with offices around the globe. Explore more at www.powerfleet.com.
